Coursework 1

Session 2013 ~ 2014

Game Programming 1

Plagiarism

Attention is drawn to the University regulations on plagiarism. Whilst discussion of the coursework between students is encouraged, the actual work has to be undertaken individually. Collusion may result in a zero mark being recorded for the coursework for all concerned and may result in further action being taken.

University regulations, codes & policies:

Submission Deadline: Wednesday 16th April 2014 no later than 11:00.

Task

Develop a 2D game of your choosing using the C++ Classes provided. These Classes can be modified as required. The chosen game must comply with the criteria listed below.

Specification

The following minimum specification (worth up to 40%) should be adhered to:

-  An introduction screen showing the name of the game and the keys to be used to play it.
-  Sound; applicable to the scene. This should include theme music and sound effects.
-  Appropriate use of basic collision detection.
-  Appropriate sprites for the game.
-  An appropriate background for the game.
-  A scoring system which must be visible.
-  An end screen saying “Game Over” and the players score. There should also be the option for the player to replay the game.

Extra

The above specification constitutes the core of the game. Extra marks (worth up to 20%) can be gained by implementing the following:

-  Implement per pixel collision detection (up to 6%).
-  Use XInput to create a class to handle input via the Xbox 360 controller (up to 6%).
-  Implement a Screen/Menu manager (up to 8%).

Deliverables

The following should be submitted:

- Development Blog (10%) - must show the process of development from concept to fruition. Use facility on GCULearn.
- Use GitHub to create a code repository which should be visible to your Lecturer. GitHub can be found at <https://github.com/> Also have a look at <https://github.com/features/projects> for GitHub features.
- Documentation including:
 - A cover page clearly stating: Name, Matriculation number, Course and the following disclaimer:
I confirm that the code contained in this file (other than that provided or authorised) is all my own work and has not been submitted elsewhere in fulfilment of this or any other award.
Signature.
 - An explanation of the code used to generate the game. This section should be written using a coherent paragraph structure and not bullet points (10%). It should also include a Class Diagram (5%).
 - All code should be fully commented.
 - Include a reference section indicating web sites, books etc. used. (2 %)

- A set of Storyboards for the game. (10%)
- Print the source code for `main.cpp` & **any classes you created**.
- Arrange a 5 minute Demo of the game with your Lecturer prior to submission.

Marking Scheme

Marks for this coursework will be awarded on the following basis:

	Mark
Code	
Intro Screen	6
Sound: Theme Music	3
Sound: Effects	4
Sprites	5
Background	3
Collision detection	4
Keyboard Control	5
Game Over	5
Replay	5
Sub Total	40
Documentation	
Headers, Footers, Page numbers, clarity etc.	3
Code Explanation	10
Class Diagram	5
Storyboards	10
References	2
Development Blog	10
Sub Total	40
Extra	
Per Pixel collision detection	6
Gamepad input	6
Implement a Screen/Menu manager	8
Sub Total	20
Total	100

Submission

Documentation should be printed and bound. For the GitHub submission of the coursework, you should create a branch called **GP3-Submission**. This branch should be created no later than the 16th of April between 10:00 - 11:00, this will be downloaded by the Lecturer very soon after this deadline.

Submission of this coursework should be made to **Bobby Law** in **M617** on **Wednesday 16th April 2013** between **10:00** and **11:00**. Late submissions will **not** be tolerated and will lead to the deduction of 10% of the total mark awarded.
